

DATA SHEET

Deep Well Plates

ISO 9001

Features

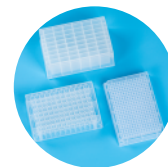

Crafted from polypropylene, it boasts excellent chemical resistance.

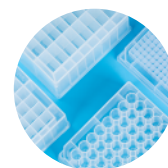

Following the ANSI-SLAS standard footprint, it's well-suited for use at pipetting stations.

Offered in configurations of 48, 96, and 384-well plates.

Meets a range of experimental needs through its variety of bottom and well shapes.

Provided in a sterile state and guaranteed to be DNase and RNase-free.

Raw Material

These plates are manufactured using pure polypropylene material.

Application

Deep well plates are a fundamental laboratory tool, featuring grid-patterned wells of larger dimensions compared to standard microplates. They find widespread use across diverse sectors, including research, biotechnology, and the pharmaceutical industry. Applications encompass sample storage, DNA and RNA extraction, liquid handling, automation, and more.

Tip Combs for Deep Well Plates

ISO ISO9001

Features

Crafted from high-quality polypropylene, it boasts strong chemical resistance.

Free from Dnase, Rnase and human DNA.

Product Range

CAT	Description	Packaging
DKT0096	96 Tip Combs, sterile, DNase and RNase free	2 PCS/Bag, 5 Bags/Box, 10 Boxes/Case

Raw Material

These tip combs are produced using pure polypropylene material.

Application

These products securely position the magnetic rod, enhancing its ability to efficiently adsorb and separate within the sample solution. Polypropylene's inherent low binding affinity towards biomolecules makes it an optimal choice for handling magnetic particles, leading to exceptional recovery of magnetic beads. They are frequently employed alongside deep well plates for nucleic acid extraction experiments.
