Cryo Tubes

ISO 9001

ISO 13485

Features

Various colored caps are ideal for distinguishing between different samples.

The white area on the tube is perfect for labeling or writing.

The lid with a silicone seal stops leaks, keeping the sample safe.

Manufactured in a 100,000 class dust-free workshop, free from Dnase, RNase, and pyrogens.

Operates within a temperature range of -196°C to 121°C.

Raw Material

The tubes are created from pure polypropylene using diamond polished molds, and the O-ring is made from silicone.

We Open To New Ideas!

Application

Cryo tubes keep important samples safe and organized. Use them for storing human or animal cells and biological material, even at ultra-low temperatures like -196°C. For optimal storage, it is recommended to store these tubes in the gas phase of liquid nitrogen.
